de la educación matemática

ARTICLES OF REFLECTION¹ OR REVIEW² EVALUATION

Check that your article meets each of the aspects to be evaluated, before sending it to the journal

Items to review
Does the abstract focuses on the text content?
Are the key words adequate?
Does the introduction explain the article's purpose and/or present the research's hypothesis?
Quality of the article in terms of writing, clarity of ideas and internal consistency.
Do the conclusions relate to the ideas developed in the text?
The article makes an original or new contribution to the field of ethnomathematics or in general to the cultural and political perspective of mathematics education?
Is there redundancy between the text, tables and illustrations?
Are the reviewed references relevant and updated?

¹ **Articles of reflection:** Document that presents the results of an investigation finished from an analytic or interpretive perspective or author critique, about a specific theme, using original sources.

² **Articles of review:** Document that results from a completed investigation where the results of published or non-published investigations, about a field of science or technology, are analyzed, sistematized, or integrated with the objective of realizing the advances and the tendencies of the development. It is characterized by a presentation of a careful bibliographic review of at least 50 references.
